Re: Soil Removal Action at NALF Fentress

Encl: (1) Groundwater Analysis from Site Inspection Report  
dtd July 31, 1992  
(2) Site Location Maps  
(3) Laboratory Certificate of Analysis

Dear Ms. Webster:

Thank you for your time on Tuesday September 27, 1994, to talk about the removal action at NALF Fentress. Per our conversation, I have enclosed some backup information to supplement our discussion. Enclosure (1) presents the groundwater results of the Site Inspection Report. The samples were taken in December 1991. Enclosure (2) shows the general site location and points out the specific area in question, and enclosure (3) presents the certificate of analysis of the results of the confirmatory sampling.

As I mentioned, we have proceeded to backfill the area with the bioremediated (clean) soil. This soil contains microorganisms and nutrients that will further condition the floor and sides of the excavation. We would appreciate, in writing, your final approval for our file by November 10, 1994. Please call at (804) 322-4776 if you have questions or need additional information with regards to this submittal.

Sincerely,

J. F. HARRIS, P.E.  
Remedial Project Manager  
Installation Restoration Section  
(North)  
Environmental Programs Branch  
Environmental Quality Division  
By direction of the Commander
